

To Whom It May Concern:

I am writing this comment to express my concern of an LPFM replacing AIR 1 (89.5, 89.7, 90.1 FM, in my area alone). AIR 1 serves me as a resident of the local community in many ways, such as informing me of local concerts that are not advertised any in any other way, brings families and the community together in positive ways, and the obvious, providing me with hours of entertainment (commercial free) 24 hours a day 7 days a week. If an LPFM were to replace AIR 1, many listeners in this area will be affected. Just in my circle of friends, family, and acquaintances, approximately 95% of them enjoy the positive and encouraging music and DJs on AIR 1. I know for certain, that they will miss AIR 1 tremendously. I believe that the public interest of AIR 1 is important because it is wholesome entertainment the station provides, not to mention, in my place of employment, this station is the only acceptable FM station to listen to. All other FM stations are against policy to listen to. There are approximately 30 employees that will be without music to listen to for an 8 hour work day. This again is another reason it is in the public interest to have AIR 1 broadcasted. Thank you for listening to my reasons for concern and please take them into consideration when deciding to remove AIR 1 from the airwaves.

Thanks again!
